Math 111.01 Summer 2003 Assignment #2

This assignment is due at the beginning of class on **Thursday, July 3, 2003**. You are encouraged to form study groups and collaborate with others on this assignment. However, the final work you submit must be your own. A piece of advice: the assignments are worth very little in the computation of your final grade. It is better to suffer through not understanding something now, rather than copying from a friend just for the sake of completion. You will not have that luxury on the exams. You must submit all problems that are marked with an asterix (*). YOUR ASSIGNMENT MUST BE STAPLED AND PROBLEM NUMBERS CLEARLY LABELLED. UNSTAPLED ASSIGNMENTS WILL NOT BE ACCEPTED!

- **1.** Practice problems.
 - Section 2.2 #3, 7, 15, 19 Section 2.3 #1, 11, 23, 25, 27, 33
 - Section 2.4 #5, 11, 15, 29, 31, 34, 41 Section 2.5 #3, 7, 15, 17, 35
 - Section 2.6 #5, 13 Section 2.7 #3, 5, 19, 21, 23, 29

2. * Problems to hand in.

- Section 2.2 #4, 6, 10
 Section 2.4 #8, 19, 30, 38, 45
 Section 2.6 #6, 12, 16
 Section 2.7 #18, 22, 34

3. * Computing limits. These involve algebraic manipulations of the kind discussed in the appendix and during the first week of class.

- Section 2.3 #9, 10, 12, 16, 17, 18, 19
- **4.** * Suppose that $d \ge 1$ and that the function f(x) satisfies

$$d^x \le f(x) \le 2d(2d-1)^{x-1}$$

for all $x \ge 0$.

- (a) If $\lim_{x\to\infty} \frac{\ln f(x)}{x} = \alpha$, show that $\lim_{x\to\infty} f(x)^{1/x} = \beta$ where $\beta = e^{\alpha}$.
- (b) Use your result from (a) to show that $d \leq \beta \leq 2d 1$. *Hint: Use the theorem on page 116.*
- 5. Chapter 2 Review Concept Check: page 181 #1-15
